

Note from the President

I have some very good news to share about two grants. First, we once again received a grant from the DNR to help offset costs of the curly-leaf pondweed treatment. This year the grant is for slightly more than \$7,000 and covers approximately 25% of the cost of treating curly-leaf pondweed. Second, we learned a few months ago that the Morrison Soil and Water Conservation District received a Legacy Fund Grant of \$71,250.00 that they had applied for at the request of our association. The funds will substantially pay for a new program run by Morrison Planning and Zoning for septic inspections on our lake for those systems where information about the system is out-of-date.

As we discussed at our general meeting last year, an ordinance change in 2012 gives Morrison County greater latitude in inspecting septic systems throughout the county. Prior to 2012, the County could only require a septic system inspection when an owner applied for a building permit or transferred property. The new ordinance, passed in January 2012, allows the County the right to inspect septic systems where there is no "adequate record of conformance." Under the new ordinance, the County can now inspect those old septic systems for which the County has little or no current information. In 2013, Morrison County will determine which septic systems on our lake require inspections, notify the homeowners, and then select one or two inspectors to handle the Fish Trap Lake inspections in 2014. There will be no costs to homeowners for the inspections but if any septic system fails the inspection, the homeowner must bring the system into compliance as per the county's directive. Low interest loans are available through Morrison SWCD as well as Region 5 out of Staples.

Our board has been urging Morrison County to adopt a septic inspection plan for many years and strongly supports the new initiative. We have concerns about the high lake levels of phosphorous and chlorophyll "a" which can result from improperly functioning septic systems. We learned at our meeting last June that Morrison County has little or no information about some of the lake's septic systems and that there was one recent case on our lake involving "direct drainage". Please plan to attend our June 22nd meeting for any additional information. Amy Kowalzek from Morrison County Planning and Zoning and Helen McLennan from the Morrison Soil and Water Conservation District will be at the meeting to answer questions.

Note that we moved the general meeting date back one week to avoid conflict with Father's Day. As noted, the meeting date is June 22nd. We start at 9:00 a.m. and provide lunch. At our meeting, we will be asking members to serve on a committee to determine how to use our annual Initiative Foundation Endowment proceeds. Please consider volunteering.

As always, thanks also to Jim Fogelberg, Jim Bluhm and all their neighbors who assist in monitoring our lake water clarity and phosphorous and chlorophyll-a levels. Their results have been sent to RMB Environmental Labs each of the last six years. For information on the water quality levels, please go to the RMBEL website at <http://www.rmbel.info/> and follow links to the Lakes Program Data Reports.

The date for treating curly-leaf pondweed this spring will be either the last or 2nd to last week in May. We will post the exact date on our website (fishtraplake.com) when we know it.

See you in June,

Chuck Salter

Fish Trap Lake Property Owner's Association Board Meeting Minutes

Scandia Valley Town Hall, April 6, 2013 at 9:30 a.m.

Meeting convened at 9:35 a.m.

Board Members present: Chuck Salter, president, Scott Schnuckle, vice president, Mike Flanagan, Peg Hartung, Jim Licari, Peggy Swalm, David Thibert, Joan Russell, Paul Baker and Ron Mash.

Secretary Report: Paul Baker moved and Scott Schnuckle seconded a motion to accept the minutes of the September 29, 2012 meeting of the Fish Trap Lake Property Owner's Association (Association). The motion carried.

Financial Report: George Heroux prepared and submitted by email the financial report for the period from September 28, 2012 to April 1, 2013. After a brief discussion, the president received and filed the report.

Old business:

A. Septic Inspections – Legacy Fund Grant, Morrison County Ordinance and next steps

Amy Kowalzek from Morrison County Planning and Zoning and Helen McLennan from the Morrison Soil and Water Conservation District attended the meeting to discuss the next steps in our septic program. Chuck Salter discussed the background for the current plan for greater enforcement of septic systems on Fish Trap Lake. Salter indicated that the Board has discussed the need for septic inspection and enforcement almost every year of the ten years he has been on the Board. He stated that two events have occurred which have now permitted the increased enforcement. First, Morrison County passed a new ordinance in 2012 which allows the county to inspect septic systems in the county where there is no adequate record of conformance. Second, the Soil and Water Conservation District received a Legacy Fund Grant of \$71,250 for septic inspections in Morrison County. Those grant funds will cover the cost of septic inspections on Fish Trap Lake.

Amy Kowalzek explained that Fish Trap Lake has been selected as a pilot study due to the fact that we were the lake association which was most adamant in pursuing the Legacy Grant funds. She stated that if the program is successful in Fish Trap, it might be extended to other lakes. Kowalzek indicated that Morrison County will prioritize inspections based on the county's record showing if and when septic systems on Fish Trap have been inspected. Kowalzek stated that there were 85 parcels with no record of any inspection and there were 60 parcels where septic systems have been inspected within the last 5 years. Of the remaining septic systems on the lake that have been inspected, about half of those inspections pre-dated 1996 and about half after 1996. After identifying septic systems that will require an inspection, Morrison County will send a notice to the homeowner and schedule a time for the inspection. Kowalzek emphasized that although the county may require a significant number of lakeshore owners to comply with septic inspections, no owner would have to pay for an inspection since grant funds would be used to cover that cost. To successfully pass the inspection, the septic pump and drainage field must operate properly and the septic container must not leak. If a system fails, the homeowner would have between 10 to 12 months to correct the problem. The county could order that components of the system be replaced or might direct the landowner to replace the existing system. Low interest loans are available (and maybe grants based on income) for those who need new systems. Kowalzek stated that the goal is to conduct the inspections in 2014. She stated that in 2013, her staff would determine which septic systems would need to be inspected and would publish a request for proposals to select an inspector(s) to handle all inspections. Kowalzek stated that part of the reason for waiting until 2014 to start the inspections is that the septic ordinance will likely be revised in 2013 or early 2014. Kowalzek added that Morrison County may look at including other septic systems not directly on the lake which might impact lake water quality.

Both Kowalzek and McLennan stated that they were very enthused about the project and asked for the continued support and help from the board to notify lakeshore owners through our newsletter and website. Board members thanked both Kowalzek and McLennan for their time and effort on this project and for taking time on a Saturday morning to discuss the septic program with the Board.

B. Paid webmaster position.

The Board invited April Powell to attend the meeting to discuss assisting the association with website updates. Powell stated that she currently works on the website for the Lincoln Area Business Association. She stated that although our website was certainly functional, she would be willing to review it thoroughly and send the Board suggested changes which, if the Board approved, she could implement. She suggested transferring the information from the current site on pbwiki to a new site with a nominal yearly fee. Mike Flanagan noted that with an optimal website, more members may use it to learn about lake information and activities. Powell suggested we also consider advertising on the website to offset costs of the website and our newsletter. Flanagan suggested that advertisers could pay for an ad on both the calendar and the website. Flanagan moved and Joan Russell seconded a motion to hire Powell to design and implement a new website in an amount not to exceed \$1,500. The motion carried unanimously. Flanagan, Salter and Peg Hartung agreed to work with Powell on the design ideas.

C. Initiative Foundation Endowment.

The Board discussed the endowment and reviewed the corrected financial report from the Initiative Foundation. The initial report from the Foundation did not reflect the Foundation's matching grant of \$10,000. The report now shows the fund at \$20,265. The next report is due in April.

D. Summer studies.

The Minnesota DNR will conduct another delineation. Jim Folgelberg, Jim Blumm and others have once again agreed to conduct the lake samples for phosphorous, chlorophyll "a" and water clarity.

E. Grants.

The DNR has again offered our association a grant to help with the expense of curly-leaf pondweed treatment. Due to the high demand for the grants, the DNR will contribute less this year than last year, paying \$100 per acre. The total proposed amount of the grant is approximately \$7,000. The DNR requested that we choose between accepting the grant amount based on last year's delineation or wait until the 2013 delineation and then determine the grant amount. Flanagan moved and Peggy Swalm seconded a motion to accept the grant amount of \$7,032. The motion carried. Professional Lake Management will again be treating the lake sometime in May. We will post the date on our website when we know it. Ron Nypan stated that our annual assessment will be \$40 this year. He noted that the assessment for Lake Alexander is about \$300 due to the cost of the treatment for Eurasian milfoil.

F. Website

Several Board members noted that connecting to the website is still somewhat problematic. We anticipate that moving the site off of pbwiki to a new location will correct those problems. We hope to have the new site operational before the June meeting.

G. Train Noise

The Board agreed that train noise will continue to get worse as more train traffic moves frac sand west and oil east. The consensus was to approach BSNF and obtain accurate current data as well as forecasts for the increase in train traffic and length of stops at the Lincoln crossroad and information about whether the stops at the Lincoln crossroads are at a regularly scheduled time. Paul Baker will talk to BSNF about that data and will approach the Morrison County engineer to see if county staff will run a simple test to determine how much extra time is needed for an emergency vehicle to travel to Highway 10 to get to the four homes accessed by the Lincoln crossroad. Scott Schnuckle will attempt to obtain information about the effect that train noise has on the real estate values of homes on Fish Trap Lake.

H. Lake Expansion

Members expressed concern about increased development and expanding docks. Salter stated that he would look at Morrison County ordinances and state laws regarding the docks. Members agreed to address development questions to Kowalzek at the June meeting.

New business:

A. Open board member position

Hartung moved and Baker seconded a motion to appoint Mary Thibert to fill an opening on the Board. The motion carried unanimously.

B. General meeting

Hartung moved and Russell seconded a motion to schedule the general meeting on Saturday, June 22, 2013. The motion carried unanimously. The meeting will be at the Scandia Valley Township Hall at 9:00 a.m. Both Kowalzek and McLennan will be at the meeting to discuss the new septic inspection program. The Board anticipates a higher turnout given the importance of the meeting. The Board will also invite Sheriff Wetzell, County Commissioner Kevin Maurer, Assessor Glen Erickson, Eric Altena and Jeff Halverson from the DNR, Patrick Selter from Professional Lake Management as well as State Senator Paul Gazelka and Representative Ron Kresha.

C. Flanagan stated that the newsletter would contain a lot of information on the new septic program and suggested that we not include an article about lake history in the spring newsletter but rather wait until the fall newsletter for that article. He stated that mailing costs go up significantly as the number of pages increase. He wanted to mail the newsletter on approximately May 1st.

D. Flanagan suggested that we look into having a contest where association members submit photos of our lake with the top 12 or so photos used in a calendar, distributed at a future meeting. One member suggested that we include advertising/ coupons on the calendars to offset printing costs. Flanagan agreed to look into that opportunity and report back to the board.

Adjourn

Ron Mash moved and Russell seconded a motion to adjourn. Motion approved. Meeting adjourned at 12:15 p.m.

Inspection of Septic Systems on Fish Trap Lake and surrounding properties

The Morrison County Planning & Zoning Office, with assistance from the Morrison County Soil & Water Conservation District, has received a grant to implement the systematic inspection of septic systems on parcels where septic system information is not known. Fish Trap Lake Association has partnered with these agencies to focus on the parcels surrounding Fish Trap Lake. The Planning & Zoning Office is in the process of evaluating each parcel along the lake. If your property is selected for inspection, you will be notified by mail. Inspection will take place summer of 2014. Planning & Zoning staff plan to attend the annual meeting this summer to visit one-on-one with anyone that has received a letter and has questions regarding the inspection process.

In this newsletter we have included a four page insert of our area businesses that have supported us this year. Please remove the insert and put it in a convenient area with your other local phone numbers. As you see them thank them for helping make this newsletter possible.

Trains, Trains, and more Trains with Whistles to match...

Our Association Board is concerned about a likely significant increase in train traffic as more railroad cars are needed to move frac sand west and petroleum products east. As you may recall, the Morrison County Board voted last June against closing the Lincoln crossing. Given the fact that almost all members at our 2012 general meeting were in favor of pursuing action by the Morrison County Board, we will again be bringing the matter to that board, now composed of new members, and requesting that the Lincoln crossing be closed. We also plan to discuss the matter again at our 2013 general meeting. If you have strong opinions either for or against the closing, please plan to attend our general meeting on June 22nd.

FTLPOA Initiative Foundation

With the matching funds we now have \$20,265 in on Initiative Foundation account. We have recognized and thank all member contributors to date. Two others have contributed, Larry Hass and the Lincoln Area Business Association (G). We wish to also thank them.

We would like to remind you that you can still contribute to the Foundation. At our Annual Meeting in June we will be looking for volunteers to be a part of the committee that determines how we distribute these funds each year. Please consider being a part of this committee.

**FISH TRAP LAKE
LAKE IMPROVEMENT DISTRICT (LID)**

**ANNUAL MEETING MINUTES
June 16, 2012**

The meeting was called to order at approximately 11:00 a.m., immediately following the adjournment of the Fish Trap Lake Property Owner's Association meeting. All Board members were present, Ron Nypan chairman, presiding. Other Board members are:

Tim Lenox, Treasurer, Lee Goderstad, Secretary, Wayne Hoffman and Larry Hager.

The previous meeting's minutes, from the March special meeting were reviewed and approved.

FINANCIAL:

The Treasurer's report showed that the LID bank cash balance is \$9296. Based on that balance and anticipated DNR grants for next year we should have enough to do 2013 curly leaf pondweed treatment without looking for additional funds.

Grant money, when received from DNR is immediately turned over to PLM, the company doing the treatment. Treatment costs in 2012 were approximately \$23,000.

NEW BUSINESS:

There was general discussion of various items; most notably that PLM is now offering treatment with chemical in granular form instead of liquid. This is more cost effective for us, and PLM tests indicate the granular treatment is just as effective. This switch saved the LID a substantial amount compared to original budget plans.

BOARD ELECTION:

Notices (post cards) soliciting volunteers for the Board were sent to all property owners several weeks before the annual meeting.

With no expressed interest from anyone other than existing Board members, three members were re-elected for two-year terms, those being Larry Hager, Tim Lenox, and Ron Nypan. As a reminder to interested property owners the LID requirements allow for seasonal property owner(s) in addition to permanent residents.

BUDGET:

Based on cash in the bank, expected revenue and continuation of DNR grant, the Board determined that the present real estate tax assessment of \$40 per year would be adequate for 2013.

There being no further business the meeting was adjourned.

**SPECIAL MEETING MINUTES
April 6, 2013**

The meeting was called to order at approximately 9:30 a.m. Board members present, Ron Nypan chairman, presiding. Other Board members are: Wayne Hoffman and Larry Hager.

NEW BUSINESS:

There was discussion of 2013 contract for treatment by PLM. The contract was approved by all board members present.

The annual meeting for 2013 was decided to follow the Fish Trap Lake Property Owners Association meeting on June 22, 2013.

There being no further business the meeting was adjourned.

2013 Fishing Contest

As you can see, it doesn't take a huge fish to win so please enter your fish. The 2013 FTLPOA Fishing Contest will again be hosted by Lincoln Bait & Gas located at the intersection of Highway 10 and County Road 3. They will register fish between 7 AM and 9 PM seven days a week. A current FTLPOA membership card must accompany the fish. 2011 membership cards are valid until June 30, 2012. First place: \$15, second place: \$10, third place: \$5.

As you enter your fish, please remember CATCH & RELEASE. The larger fish are generally females, they play a large role in the process of preserving the quality of fishing in our lake for many years to come.

2013 Annual Meeting

9:00 A.M. Scandia Valley Town Hall – lunch provided after meeting

Come join us and many representatives of our county and state who will be present for discussions.
